

Push-In

design Ueli Biesenkamp

ICF

The way we live today often clashes with earlier cultural models in view of wholly new needs arising out of rapid, sometimes unpredictable technological developments that have led, for example, to a new trend toward Home-Working and other forms of activity less and less geared to traditional office organization. ICF has just the right answer to respond to these new needs: Push-In, an innovative Office System that combines the elegance of fine design with special attention to functional performance. The significant feature of Push-in is its versatility: it is a modular system made up of three basic elements (two containers, one of which acts as a support, and a work top),

that can be used separately or combined into a single compact unit, fitting nicely into a wide variety of different spatial. The versatility and rapid configurability of Push-In permits the user to change the shape and size of his or her workstations depending on the different needs and requisites at different times. A sufficient availability of accessories and additions also makes it possible to respond in real time to demands for new, special functions, making Push-In the ideal solution for a wide range of uses: from the informal office (for staff or management) to the shop, professional studio and the most advanced forms of Home- Office.

Tops available in solid laminate, veneer and underpainted glass
Piani disponibili in laminato stratificato, essenza e cristallo retroverniciato

Tubular steel leg can be fastened on the undertop structure
Gamba in tubolare metallico posizionabile lungo la struttura sottopiano

L'ambiente di lavoro si trova oggi di fronte a modelli di comportamento del tutto inediti, dettati da un'evoluzione tecnologica rapida e talvolta imprevedibile che favorisce la tendenza a forme di attività sempre più svincolate dall'organizzazione dell'ufficio tradizionale. A queste esigenze ICF fornisce una risposta appropriata con Push-In, un sistema innovativo che unisce l'eleganza del design a una particolare attenzione per la funzionalità e le prestazioni d'uso. La versatilità e la rapidità di configurazione di Push-In permettono all'utente di variare progressivamente forma e dimensioni

delle postazioni di lavoro a seconda delle necessità e delle esigenze del momento. Un'adeguata disponibilità di accessori e complementi consente inoltre di rispondere in tempo reale alla richiesta di funzioni nuove e specialistiche, rendendo Push-In la soluzione ideale per una vasta gamma di impieghi: dall'ufficio tradizionale o informale (sia operativo sia direzionale) al front-office e al negozio, dallo studio professionale alle forme più avanzate di Home-Office.

Upholstered screen in fabric
Screen rivestito in tessuto
